

MONICA TO BE
OPERATED SOONHumboldt Smelter to Add a
Third Shift to Handle
Bluebell Ores.

Tucson, Ariz., May 25.—Within 20 days operations will be in full blast at the Monica mine, near Kirkland valley, which was taken over several months ago by the Deheberts. Units Mining company of Los Angeles.

Since last February a force of men has been at work cleaning out the old workings and repairing the 25 stamp mill on the ground. All the plates have been discarded from the mill and the method of treatment will be by crushing. Enough ore is in sight on the 1000-foot level to keep the mill operating at least four months.

The Monica comprises 11 patented claims and is one of the best known of Yavapai county's oldtime properties. A few years ago the mill turned out a single bar of gold—bullion worth \$18,000.

Smelter to Add Third Shift.
A third shift is about to be put on at the Humboldt smelter. The capacity of the plant is now taxed to the utmost. It is handling the ore from the Bluebell mine and within a short time will be called on to treat large shipments from the De Soto. An electric transmission line is (Continued on next page.)

KEEP THE CHILDREN
BRIGHT AND HAPPY

Happy youngsters must be healthy. The digestive organs of children get out of order as readily as do those of their elders, and the result is equally distressing. When the bowels are clogged with an accumulation of refuse from the stomach the child naturally becomes cross and fretful from the discomfort, and is often punished for temper when medical attention is really what is needed.

The next time your child is cross and unhappy, without apparent reason, try giving it a mild laxative. Dr. Caldwell's Syrup Pepsin is a mild, pleasant tasting combination of simple laxative herbs with pepsin, and is especially recommended for children because of its freedom from all opiate or narcotic drugs, and its gentle action. It is sold in drug stores everywhere. A free trial bottle can be obtained by writing to Dr. W. W. Caldwell, 452 Washington St., Monticello, Ill.

FORT WORTH WOMAN
TELLS ABOUT HEALTH

Mrs. Reed, long a sufferer from stomach ills, can eat and now sleeps like a baby.

Mrs. William Reed of 1511 Sutterly place, Fort Worth, Texas, suffered from stomach derangements for years. She could not eat with satisfaction. Her sleep was broken and life was miserable.

"She took May's Wonderful Remedy. The wonderful results startled her and her friends. She wrote:

"I have lots of people come to me to find out where to get your remedy, as I was in such a terrible condition, and it helped me so much. I can eat most anything my appetite craves and I sleep like a baby."

May's Wonderful Remedy gives permanent results for stomach, liver and intestinal ailments. But as much and faster, you like. No more distress after eating, pressure of gas in the stomach and around the heart. Get one bottle of your druggist now and try it. An absolute guarantee—if not satisfactory money will be refunded—Adv.

GOLCONDA NOW
IN NEW HANDSFinal Transfer of Big Zinc
Property to Easterners
Is Effected.

Kingman, Ariz., May 25.—The final transfer of the Golconda zinc mine, in Union basin, to the eastern syndicate headed by N. L. Amster, of the Shannon Copper company, has been effected. John Boyle, manager of Golconda, who owned three-fourths of the stock, received \$150,000 net for his interest. The smaller stockholders pooled their interests for a transfer to the Amster syndicate.

Five years ago Boyle took hold of the Golconda as a mere prospect. He soon began shipping ore. For a time he had hard work making the mine pay expenses but in the end he made it pay a profit. Practically all the ore extracted went to the zinc smelter at Bartlesville, Oklahoma.

It is reported that the Amsters will enlarge the plant and increase the equipment considerably. They will continue to ship concentrates and the richest ore in Bartlesville.

California Buy Tungsten Mine.
L. J. Stevens, F. M. Townsend and G. L. Cooper, of Los Angeles, have purchased the Williams tungsten mine, in the Aqueduct mountains, miles southeast of Kingman. The price was \$50,000, a first payment of \$20,000 being made. The new owners will commence active development at once, with Mr. Stevens in charge. They expect to place a mill on the property as soon as it can be determined what type of concentrator is best adapted to the ore.

New York capitalists, headed by Charles Opler, have purchased from W. A. Brooks the Gilt Edge group, paying \$600,000 cash. The Gilt Edge group comprises six claims, cut from end to end by a four foot ledge that samples as high as \$125 a ton in gold.

H. K. Wheeler, representing Los Angeles investors, has taken an option on the Lacy Boy group of five claims, owned by Joe Kraus. These claims lie between the Lacy and the Lacy and are considered as being among the most promising in the Gilt Edge district.

The Orion Mining & Milling company, which recently purchased the Victor mine, is now equipped with electrical machinery.

Fred Crozier and J. O. A. Carper, successful oil and gas operators, have taken over the Straight, Hardy and Cash Bitter groups, and the Sunlight and Moonlight claims. The Sunlight and Moonlight claims, which are situated in the Gilt Edge district, are considered as being among the most promising in the Gilt Edge district.

COSTS ABOVE \$5
TO GROW ALFALFAPanhandle Men Figure the
Cost; One Says \$5,
Another \$6.50.

Plainview, Tex., May 25.—Alfalfa in the Plains country or in any other good alfalfa country, costs approximately \$5 a ton to produce, according to J. I. Pope, assistant agricultural demonstrator for the Panhandle & Santa Fe Railway company.

In speaking of the cost of raising alfalfa, Mr. Pope said:

"It should be \$5 an average. However, the cost often exceeds that. Sometimes it will go as high as \$5.50 and \$6. I am sure that a majority of the farmers reckon costs too low. Where alfalfa must be stacked before baling the cost will be higher. You sometimes hear farmers claim their alfalfa cost them only \$2 and \$3 a ton. That is too low, and they have overlooked some of the elements of cost."

Graham Figures Cost Higher.
E. Graham, who raises alfalfa on his irrigated farm near Plainview, thinks the cost is higher than \$5. He has kept a record of the expenses incurred in producing his crop and he says:

"I find the cost per ton ranges from \$6.50 to \$7. This includes the labor cost of irrigating twice, oil, etc., 10 percent wear on machinery, cutting, baling, etc. Taking for granted that there is no rainfall, two irrigations would be necessary to insure a crop."

He has five cuttings last year. The hay brought \$12.50 per ton. In 1912 the price was \$12. It will probably be \$12.50 to \$14 this year.

Most practical farmers in the Plainview district are agreed that the most profitable way to handle alfalfa, as every other feed, is to feed it to stock. Mr. Graham follows this program with registered cattle and some Poland-China and Duroc-Jersey hogs. He has 24 head of registered Herefords. The income per ton is better when feeding and pasturing are practiced.

On a farm of 160 acres he has 75 acres in alfalfa. A forty horsepower Heer double cylinder engine and Gray pump irrigate the entire 160 acres.

On the farm there are 250 head of hogs.

**TEMPE FARMERS VOTE BONDS
TO INSTALL DRAINAGE SYSTEM**

Tempe, Ariz., May 25.—Bonds in the sum of \$25,000 were voted by the land owners of drainage district No. 1, which comprises 10,000 acres of land south of Tempe. The work of installing a drainage system will be under way in two or three months. It is estimated that the system will cost little more than \$25,000.

The plan is to dig a main ditch through the center of the district, from seven to 11 feet wide and about nine miles long. The trained water will be used for the irrigation of several thousand acres of land on the Sacaton indian reservation.

**CHINO COPPER COMPANY
HAS REMARKABLE GROWTH**

Santa Fe, N. M., May 25.—The fourth quarterly report of the Chino Copper company has just been published and shows remarkable increase in copper production. In the month of March it was 4,468,087 pounds, as against 2,427,000 of the last month of the previous quarter, while for the quarter ending April 1, the production was 13,722,500 pounds, as against 9,345,585 pounds the previous quarter.

An average of 4511 tons per day was treated. The cost of producing the copper was 7.48 cents and as copper is sold at 19 cents, the profit is a handsome one. The net profits for the quarter were \$889,437.94, out of which dividends aggregating \$494,719 were paid, leaving \$394,718.94 added to the surplus. A total of \$24,125 cubic yards was moved with steam shovels.

The El Paso Ice and Refrigerator Co. maintains its own delivery system. Pure distilled water and ice. Phones 111-115.—Advertisement.

Capon Is Rare Bird In West

Caponized Cockerels Bring Good Prices, Make Fine Hatching and Care for Small Chickens in the Flock.

By W. MONROE JACKSON.

WHAT to do with the surplus cockerels in the poultryman's problem each year. The breeder in many of the eastern states are answering that question with the capon. In the last few years the capon industry has increased very rapidly. In some sections of many of the eastern states capons can be found on nearly every farm, and they bring the best prices of any fowl sold on the market.

Capon Is Rare in West.
Capon is a rare thing on most of our western farms, because the people who raise poultry have not realized what they are and the profits they bring. A great many people do not know there is such a thing as a capon. Still others consider the operation of caponizing either difficult or cruel and refuse to attempt it. There is no reason at all why the people shouldn't raise more capons than they do.

Caponizing has been in practice for several centuries in foreign countries. The capon in the olden times was the crowning glory of the feast of the ancient kings and queens.

What Is a Capon?
A capon is a male bird (cockerel) from which the testicles have been removed. To become a capon a young bird must be operated on in such a manner as to destroy the testicles. The operation is not difficult and is intended for eating purposes. His only function in life is to grow and get fat. His flesh is the juiciest, sweetest and most tender of any known meat, selling for much more per pound than any other kind of fowl.

He grows much faster, the comb and wattles grow to great size, his plumage is much more abundant, beautiful and soft. He gets very lazy and neither hops nor rooster have any more to do with him. He makes a great pet and

later on he becomes a very intimate friend of the little chick and sometimes broods over them at night. If you have never seen a capon with a brood of chicks then you have missed a great sight. He has the old hen bent when it comes to taking real good attention and loving care of a brood of newly hatched chicks.

Get Large Birds.
The larger breeds, such as the Brahmas, Orpingtons, Plymouth Rocks, Langshans, Rhode Island Reds, Wyandottes and similar varieties, make the best capons. The larger the capon the higher the price per pound. Quality counts in capons as well as in all other animals.

Pure bred fowls show up their quality, run much more even in all market requirements than common or mixed bred fowls, therefore, it is very desirable to use standard or pure bred fowls for capons. Some people seem to think there is no market for capons in El Paso. They are a mistaken idea. You raise a few this year and you will soon find out there is not only a market but a demand for them at fancy prices. It is no question of how much you can get for the capon; the point is you cannot afford to be without capons even though you never intend to sell on the market. Even at 12 pounds, a capon you will never be without one.

Operation Is Simple.
The operation is so simple and easy a ten year old child of ordinary intelligence can easily learn to perform it. The cockerel should be caponized when he is quite small, not larger than a quail. This is usually when they are from six to ten weeks old. Caponized when this young, they will grow to weigh from eight to 12 pounds in 12 months. Get you a set of tools of the right kind and have a fat capon for your next Christmas dinner.

MESA HAS INEXHAUSTIBLE UNDERGROUND WATER SUPPLY

Mesa, Ariz., May 25.—That the underground water supply in the district east of Mesa is practically inexhaustible, was demonstrated by a test made at the J. P. Wheeler ranch. Mr. Wheeler has installed a centrifugal pump with a capacity of 500 gallons a minute in a 200-foot well. The pump was run over an hour and the water level 90 feet below the surface, was not lowered a fraction of an inch.

Mr. Wheeler's water supply is more than sufficient, Wheeler is now arranging to put his ranch under cultivation.

HEREFORD FARMERS BEGIN FIRST CUTTING OF ALFALFA

Hereford, Tex., May 25.—Hereford alfalfa growers commenced their first cutting of alfalfa for the season this week. The cutting is being made about fifteen days earlier this year than last. It is expected it will be the latest first cutting in the history of alfalfa growing in the Hereford district. As Kansas City has 8,000 cars of alfalfa shipped to the Hereford district, farmers expect to get exceptionally good prices this year.

E. L. Mabson was the first to begin gathering his alfalfa. He started last week on his farm north of town.

GLENDALE FARMER EXPECTS TO MAKE \$200 NET AN ACRE

Glendale, Ariz., May 25.—To make all his land produce net returns of \$200 an acre this year is the task to which George N. Morgan, a Glendale farmer, has set himself. He seems to be in a fair way to succeed, having just harvested more than 25 tons of fine potatoes from 12 acres. Seven acres produced 14 tons of Bermuda onions. Morgan is now preparing to plant red beans on his potato and onion land.

CLINT NEGROES TO CELEBRATE

The negro residents of Clint have decided to celebrate Emancipation day, June 19, with a barbecue, dancing and other sports. They have extended an invitation to the friends of the race in El Paso to bring baskets and enjoy the day picnicking.
